

Controlworks is an independent systems integrator, dedicated to providing reliable and innovative building automation and HVAC control solutions to all sectors of the property and construction industries.

We embrace open protocol and proprietary systems, and use:

- multiple cutting edge products from various leading suppliers.
- Tridium and Distech products to provide open, multi-vendor solutions.

opportunities for a Service Technician are available to join this expanding business.

You will:

- be part of a team who manages a portfolio of customers and maintenance contracts.
- provide day to day maintenance, breakdown servicing, installation, engineering and commissioning on mechanical electrical systems and building management & control systems.

To be considered for this role, you will have:

- a trade or tertiary qualification in a mechanical or electrical engineering discipline.
- a strong track record in building automation and / or HVAC air-conditioning and / or refrigeration.
- a can do attitude with a willingness to learn and work as part of a team.
- excellent problem solving and communication skills.

In return, you will be given a fantastic opportunity to work in your chosen field as part of a supportive and successful team within a growing company. You will be given ongoing support, and opportunity for growth, as well as an attractive salary.

If you think you have what it takes to not only fill this space, but to really make it your own, please send your CV to [sharyn.gregory@controlworks.com.au](mailto:sharyn.gregory@controlworks.com.au). All applications are treated as confidential and your privacy respected.
